

98UH5E / 86UH5E / 75UH5E

Vibrant Colors and Powerful Performance Bring Content to Life

UH5E Series

With superb picture quality and cutting-edge intelligence, the UH5E series invigorates colors without the aid of peripherals. Its quality and brightness are enough to capture the attention of anyone viewing this large Ultra HD digital signage.

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

Superior Picture Quality

True Color, Immersive View

The UH5E series is large enough to display a variety of content and draw the undivided attention of various viewers. LG IPS panel features a wide range of viewing angles to deliver clear content regardless where viewers are positioned. Each pixel in the IPS panel reproduces image colors true-to-life, without distortion.

Vivid Color Details with Ultra HD

The UHD resolution allows users to view details even when magnified on the display, processing four times higher definition than FHD. The UH5E series ensures stable UHD video playback with HEVC (High Efficiency Video Coding).

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

Powerful webOS Smart Signage Platform

Easy Content Management

The embedded CMS (Content Management System) allows you to create and edit content using internal/external sources as well as set playlists to play on a custom schedule without the need for a separate PC. Thanks to the intuitive user interface, content management has been made much easier.

Simple Group Management

The embedded Group Manager allows one master display to manage other displays connected on the same network. This way you can group and control multiple displays in your business and distribute playlists to them all at once, using input devices such as a remote control.

* One master display can create a maximum of 25 groups, and each group can consist of a maximum of 12 managed displays.

Vibrant Colors and Powerful Performance Bring Content to Life

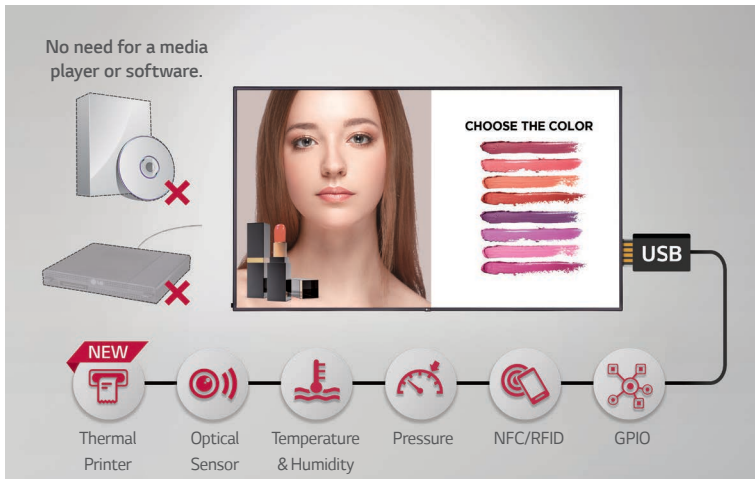

98/86/75UH5E

Powerful webOS Smart Signage Platform

Various Sensor Applications

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc. via USB plug-in.

There is no need to purchase additional software or media players for creating value-added solutions.

Multi Screen Mode

PBP (Picture-By-Picture) features multi screen in a single display with upto 4 input sources while PIP (Picture-In-Picture) supports playing both main screen and sub screen at the same time with various layouts. This gives great flexibility to allocate space for each content source.

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

Easy Maintenance

Real-Time Monitoring & Control

Control Manager is an embedded feature that allows web monitoring via a web browser. This feature gives the user the ability to control and monitor the status of multiple displays in different locations in real-time. Control Manager is available on internet-connected devices, allowing users to quickly and easily address emergency issues.

Remote Cloud Service

The maintenance gets easier and faster with an optional service Signage 365 Care*, a cloud service solution provided by LG service. It remotely manages status of displays in client workplaces for fault diagnosis and remote-control services, helping to maintain a stable business operation.

* The availability of "Signage 365 Care" service can differ by region, so please contact the LG sales representative in your region for further details.

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

Wireless Solutions

Content Sharing

Content Mirroring among devices is accomplished simply via Wi-Fi network.

Real-time Promotion

With Beacon and BLE (Bluetooth Low Energy), store managers can provide coupons and information in real-time.

Wireless Access Point

The UH5E series operates as a virtual router which can be a wireless access point for mobile devices.

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

High Compatibility

Compatibility with AV Control System

The UH5E series has been certified Crestron Connected® for a higher level of compatibility with professional AV controls to achieve seamless integration and automated control*.

* Network-based control

Compatibility with Video Conference System

For the optimum visual meeting, the UH5E has certified its compatibility with Cisco Spark Room Kits, a system that offers powerful and integrated control* for a smarter video conference, eliminating a time wasted setting up the picture quality or changing the input on incoming calls.

* The integrated control of the display and Cisco system is enabled through the HDMI cable connection.

Vibrant Colors and Powerful Performance Bring Content to Life

98/86/75UH5E

Space-efficient Design

Slim and Tidy in Appearance

Although UH5E series is a large-sized display, the product still has a slim depth, which takes up less space per installation. A sleek look is maintained while providing a large, immersive view.

Detachable Logo & Built-in Speaker

The detachable logo allows for installation in the desired orientation in landscape or portrait mode, making it easy to arrange the signage. Also, sounds can be played from built-in speakers*, giving advertisements greater impact.

Detachable Logo

Built-in Speaker

* Built-in speakers on 75" and 86" models only.
